

# EASY-SCOUT XP

## Recent Report Additions and Enhancements

The most current release of Easy-Scout XP contains a number of new reports. Many of these reports were developed based on input from coaches using Easy-Scout. The new reports fall into 4 categories:

- 1) "Grid-Style" chart reports
- 2) List style Reports
- 3) "Paper-saver" reports
- 4) Combination Reports.

The reports are included with the 2004 Version of Easy-Scout XP and are a free download for anyone who needs them.

<b>1st Down</b>								Total Plays	4		
								Runs	3	75%	
								Passes	1	25%	

*These reports are particularly suitable when analyzing a single game or two games at a time. They list plays and usually sort the report in a particular way. In the report above, each Down begins on a separate page, and the Distance is the secondary sort, so all 2nd and 10's, 2nd and 8's 2nd and 3's will be together.*

*This report illustrates the benefit of a listing style of report. In this report, for each Hash and then each Formation the Details are listed for each play including the Hash, Formation Strength and Play Direction. This makes it very easy to pinpoint particular plays or tendencies that might be revealed initially another report.*

One of the things we hear from coaches year-in and year-out is how much they like the "readability" of Easy-Scout's "Portrait-style" reports—particularly the "white space for making notes."

Since its inception, Easy-Scout has included this type of report as its standard format, however until this year we included quite a bit of additional statistical data under each heading (in this case under the totals for each formation). Last year, one of our new customers asked if we could remove the totals. We did it quickly and shipped him a new report that he "imported" in seconds.

We thought it was such a good idea, we decided to add it to Easy-Scout XP this year and to create a "No Summary" version of our Down and Distance report as well (not shown). Thanks Coach Stroud!

There's no cause for concern among our customers who like the detail for each Formation or Situation—we did not remove any reports! With Easy-Scout XP's new Report Manager, it's easy to add different styles of the same basic report and let the user choose the one that's preferable.

*Back in 1985, we introduced this report WITH the totals under each formation. This report was really a paper killer” so we removed it from the program and only made it available on request.*

*This is one of the favorite reports of just about every Defensive Coordinator at the HS and Small College level that uses it. Most offenses can disguise one or the other—either Formation or Down and Distance tendencies. But its really tough for them to disguise them BOTH when you can look at them together.*

*A “No Summary” format cuts down the length, and the Report Manager lets you remove it from Report Groups before printing—if you really can live without it!*
